## EUROPEAN AND MEDITERRANEAN PLANT PROTECTION ORGANIZATION ORGANISATION EUROPEENNE ET MEDITERRANEENNE POUR LA PROTECTION DES PLANTES Summary sheet of validation data for a diagnostic test

The EPPO Standard PM 7/98 Specific requirements for laboratories preparing accreditation for a plant pest diagnostic activity describes how validation should be conducted. It also includes definitions of performance criteria.

| Laboratory contact details  | Anses Plant Health Laboratory - Nematology Unit<br>Domaine de la Motte au Viconte BP 35327, 35653<br>Le Rheu, France  |  |
|---|---|--|
| Short description of the test   | Identification of Globodera pallida and G.<br>rostochiensis by species specific PCR - Fullaondo<br>1999   |  |
| Date, reference of the validation report                                      | 2010-07-13 - ref. 10/03   |  |
| Validation process according to EPPO<br>Standard PM7/98?                      | yes   |  |
| Is the lab accredited for this test?  | no  |  |
| Was the validated data generated in the framework of a project?               |   |  |
|   |   |  |
| Description of the test   |   |  |
|   |   |  |
| Organism(s)   | Globodera pallida (HETDPA)<br>Globodera rostochiensis (HETDRO)  |  |
| Detection / identification  | identification  |  |
| Method(s)   | Molecular Conventional PCR  |  |
| Method: Molecular Conventional PCR  |   |  |
| Reference of the test description   |   |  |
| As or adapted from an EPPO diagnostic protocol                                | no  |  |
| As or adapted from an IPPC diagnostic protocol                                | no  |  |
| Reference of the test   | Fullaondo et al. (1999). Identification of potato cyst<br>nematode species Globodera rostochiensis and G.<br>pallida by PCR using specific primer combination.<br>Nematology 1, 157-163 |  |
| Other information   |   |  |
| Are the performance characteristics included in the EPPO diagnostic protocol? | no  |  |
| Performance Criteria :  |   |  |
| Organism 1.:  | Globodera pallida(HETDPA)   |  |
| Analytical sensitivity  |   |  |

| What is smallest amount of target that can be detected reliably?  | 1 J2  |  |
|---|---|--|
| Analytical specificity - inclusivity  |   |  |
| Number of strains/populations of target organisms tested  | 11 populations of G. pallida (for details see validation report annex 2)  |  |
| Specificity value   | 91% for G. pallida (1 non target species detected as G. pallida among 11 non target species)  |  |
| Analytical specificity - exclusivity  |   |  |
| Number of non-target organisms tested   | 7 populations nematodes species other than G.<br>pallida or G. rostochiensis  |  |
| Specificity value   | cross reaction with ""G. mexicana"" population<br>(even if G. mexicana is not recognised as a<br>validated species).  |  |
| Cross reacts with   | Globodera mexicana  |  |
| Reproducibility   |   |  |
| Provide the calculated % of agreement for a given level of the pest (see PM 7/98)   | 86% for Globodera pallida (at 1 J2 level)   |  |
| Repeatability   |   |  |
| Provide the calculated % of agreement for a given level of the pest (see PM 7/98)   | 100% for Globodera pallida (at 1 J2 level)  |  |
| Organism 2.:  | Globodera rostochiensis(HETDRO)   |  |
| Analytical sensitivity  |   |  |
| <u> </u>  |   |  |
