EUROPEAN AND MEDITERRANEAN PLANT PROTECTION ORGANIZATION ORGANISATION EUROPEENNE ET MEDITERRANEENNE POUR LA PROTECTION DES PLANTES Summary sheet of validation data for a diagnostic test

The EPPO Standard PM 7/98 Specific requirements for laboratories preparing accreditation for a plant pest diagnostic activity describes how validation should be conducted. It also includes definitions of performance criteria.

Date, reference of the validation report 2019-03-13 - 2019-03-13 - Implementation of sampling procedures for testing composite sample for Xylella fastidiosa. POnTE - XF-ACTORS, 2nd Join Annual Meeting: European Research on Emerging			
Of cherry Date, reference of the validation report 2019-03-13 - 2019-03-13 - Implementation of sampling procedures for testing composite sample for Xylella fastidiosa. POnTE - XF-ACTORS, 2nd Join Annual Meeting: European Research on Emerging Plant Diseases. Valencia, 23-26 october 2018. Boo of abstract: p. 63.	Laboratory contact details		
sampling procedures for testing composite sample for Xylella fastidiosa. PONTE - XF-ACTORS, 2nd Join Annual Meeting: European Research on Emerging Plant Diseases. Valencia, 23-26 october 2018. Boo of abstract: p. 63. Validation process according to EPPO no Standard PM7/98? Is the lab accredited for this test? yes Was the validated data generated in the framework of a project? Description of the test Organism(s) Xylella fastidiosa (XYLEFA) Detection / identification detection Method(s) Extraction Molecular Extraction DNA RNA Molecular Extraction DNA RNA (2) Molecular Extraction DNA RNA (3) Molecular real time PCR Method: Extraction Reference of the test description Other information Other details on the test The preparation of the olive samples is different from the description reported in the EPPO DP Method: Molecular Extraction DNA RNA Reference of the test description As or adapted from an EPPO diagnostic protocol	Short description of the test	detection of Xylella fastidiosa in composite samples of cherry	
Standard PM7/98? Is the lab accredited for this test? yes	Date, reference of the validation report	sampling procedures for testing composite samples for Xylella fastidiosa. POnTE - XF-ACTORS, 2nd Joint Annual Meeting: European Research on Emerging Plant Diseases. Valencia, 23–26 october 2018. Book	
Was the validated data generated in the framework of a project? Description of the test Organism(s) Xylella fastidiosa (XYLEFA) Detection / identification Method(s) Extraction Molecular Extraction DNA RNA Molecular Extraction DNA RNA (2) Molecular Extraction DNA RNA (3) Molecular Extraction DNA RNA (3) Molecular real time PCR Method: Extraction Other information Other details on the test The preparation of the olive samples is different from the description reported in the EPPO DP Method: Molecular Extraction DNA RNA Reference of the test description As or adapted from an EPPO diagnostic protocol Yes	-	no	
Description of the test	Is the lab accredited for this test?	yes	
Organism(s) Detection / identification Method(s) Extraction Molecular Extraction DNA RNA Molecular Extraction DNA RNA (2) Molecular Extraction DNA RNA (3) Molecular Extraction DNA RNA (3) Molecular real time PCR Method: Extraction Reference of the test description Other information Other details on the test The preparation of the olive samples is different from the description reported in the EPPO DP Method: Molecular Extraction DNA RNA Reference of the test description As or adapted from an EPPO diagnostic protocol yes			
Organism(s) Detection / identification Method(s) Extraction Molecular Extraction DNA RNA Molecular Extraction DNA RNA (2) Molecular Extraction DNA RNA (3) Molecular Extraction DNA RNA (3) Molecular real time PCR Method: Extraction Reference of the test description Other information Other details on the test The preparation of the olive samples is different from the description reported in the EPPO DP Method: Molecular Extraction DNA RNA Reference of the test description As or adapted from an EPPO diagnostic protocol yes			
Detection / identification Method(s) Extraction Molecular Extraction DNA RNA Molecular Extraction DNA RNA (2) Molecular Extraction DNA RNA (3) Molecular real time PCR Method: Extraction Reference of the test description Other information Other details on the test The preparation of the olive samples is different from the description reported in the EPPO DP Method: Molecular Extraction DNA RNA Reference of the test description As or adapted from an EPPO diagnostic protocol yes	Description of the test		
Detection / identification Method(s) Extraction Molecular Extraction DNA RNA Molecular Extraction DNA RNA (2) Molecular Extraction DNA RNA (3) Molecular real time PCR Method: Extraction Reference of the test description Other information Other details on the test The preparation of the olive samples is different from the description reported in the EPPO DP Method: Molecular Extraction DNA RNA Reference of the test description As or adapted from an EPPO diagnostic protocol yes			
Method(s) Extraction Molecular Extraction DNA RNA Molecular Extraction DNA RNA (2) Molecular Extraction DNA RNA (3) Molecular real time PCR Method: Extraction Reference of the test description Other information Other details on the test The preparation of the olive samples is different from the description reported in the EPPO DP Method: Molecular Extraction DNA RNA Reference of the test description As or adapted from an EPPO diagnostic protocol Extraction Molecular Extraction DNA RNA yes	Organism(s)	Xylella fastidiosa (XYLEFA)	
Molecular Extraction DNA RNA Molecular Extraction DNA RNA (2) Molecular Extraction DNA RNA (3) Molecular real time PCR Method: Extraction Reference of the test description Other information Other details on the test The preparation of the olive samples is different from the description reported in the EPPO DP Method: Molecular Extraction DNA RNA Reference of the test description As or adapted from an EPPO diagnostic protocol Molecular Extraction DNA RNA yes	Detection / identification	detection	
Reference of the test description Other information Other details on the test The preparation of the olive samples is different from the description reported in the EPPO DP Method: Molecular Extraction DNA RNA Reference of the test description As or adapted from an EPPO diagnostic protocol yes	Method(s)	Molecular Extraction DNA RNA Molecular Extraction DNA RNA (2) Molecular Extraction DNA RNA (3)	
Other information Other details on the test The preparation of the olive samples is different from the description reported in the EPPO DP Method: Molecular Extraction DNA RNA Reference of the test description As or adapted from an EPPO diagnostic protocol yes	Method: Extraction		
Other details on the test The preparation of the olive samples is different from the description reported in the EPPO DP Method: Molecular Extraction DNA RNA Reference of the test description As or adapted from an EPPO diagnostic protocol Yes	Reference of the test description		
Method: Molecular Extraction DNA RNA Reference of the test description As or adapted from an EPPO diagnostic protocol yes	Other information		
Reference of the test description As or adapted from an EPPO diagnostic protocol yes	Other details on the test	1 ' '	
As or adapted from an EPPO diagnostic protocol yes	Method: Molecular Extraction DNA RNA		
protocol	Reference of the test description		
EPPO Diagnostic Protocol name PM 7/024 Xylella fastidiosa (version 4)	_	yes	
	EPPO Diagnostic Protocol name	PM 7/024 Xylella fastidiosa (version 4)	
Is the test modified compared to the reference test	-	no	

Kit		
Is a kit used	yes	
Manufacturer name	QIAGEN	
Specify the kit used	DNeasy mericon Food Kit	
Kit used following the manufacturer's instructions?	yes Modified DNeasy MericonTM Food Standard Protocol	
Other information		
Other details on the test	Total DNA were extracted from composite samples of cherry, prepared as reported in the attached additional file, by using "Modified DNeasy MericonTM Food Standard Protocol" (Qiagen)	
Method: Molecular Extraction DNA RNA (2)		
Reference of the test description		
As or adapted from an EPPO diagnostic protocol	yes	
EPPO Diagnostic Protocol name	PM 7/024 Xylella fastidiosa (version 4)	
Is the test modified compared to the reference test	no	
Other information		
Other details on the test	Total DNA were extracted from composite samples of cherry, prepared as reported in the attached additional file, by using CTAB-based protocol;	
Method: Molecular Extraction DNA RNA (3)		
Reference of the test description		
As or adapted from an EPPO diagnostic protocol	no	
Kit		
Is a kit used	yes	
Manufacturer name	PROMEGA	
Specify the kit used	Maxwell® RSC PureFood GMO and Authentication Kit	
Kit used following the manufacturer's instructions?		
Other information		
Other details on the test	Total DNA were extracted from composite samples of cherry, prepared as reported in the attached additional file, by using "Maxwell® RSC PureFood GMO and Authentication Kit" protocol (Promega)	
Method: Molecular real time PCR		
Reference of the test description		
As or adapted from an EPPO diagnostic protocol	yes	
EPPO Diagnostic Protocol name	PM 7/024 Xylella fastidiosa (version 3)	

Name of the test	Real-time PCR - simplex (Harper et al., 2010; erratum 2013)	
Is the test modified compared to the reference test	yes BSA was not included in the amplification MIX	
Other information		
Performance Criteria :		
Organism 1.:	Xylella fastidiosa(XYLEFA)	
Analytical sensitivity		
What is smallest amount of target that can be detected reliably?	0.2 gr of xylem tissue scraped from 2 shoots recovered form one infected plant of cherry, in 20 gr of xylem tissue recovered from Xylella-free plant	
Diagnostic sensitivity		
Proportion of infected/infested samples tested positive compared to results from the standard test, see appendix 2 of PM 7/98	100% using each test reported above to extract the total DNA	
Standard test(s)	Standard tests reported in appendix 3 and 5 of PM 7/24 (3)	
Diagnostic Specificity		
Proportion of uninfected/uninfested samples (true negatives) testing negative compared to results from a standard test	100% using each test reported above to extract the total DNA	
Specify the test(s)	Standard tests reported in appendix 3 and 5 of PM 7/24 (3)	
Repeatability		
Provide the calculated % of agreement for a given level of the pest (see PM 7/98)	100% using each test reported above to extract the total DNA	
Test performance study		
Test performance study?	no	
Other information		
Any other information considered useful	These validation data were obtained by IPSP-CNR in collaboration with the Department of Soil, Plant and Food Science of the University of Bari (ITAY). For any additional detail, see the attached file.
