EUROPEAN AND MEDITERRANEAN PLANT PROTECTION ORGANIZATION ORGANISATION EUROPEENNE ET MEDITERRANEENNE POUR LA PROTECTION DES PLANTES Summary sheet of validation data for a diagnostic test

The EPPO Standard PM 7/98 *Specific requirements for laboratories preparing accreditation for a plant pest diagnostic activity* describes how validation should be conducted. It also includes definitions of performance criteria.

Laboratory contact details	Anses Plant Health Laboratory - Pests and Tropical Pathogens Unit Pôle de Protection des Plantes, 7 Chemin de l'IRAT, 97410 Saint Pierre, France
Short description of the test	Detection and identification of 'Candidatus Liberibacter asiaticus' and 'Candidatus Liberibacter africanus' by Molecular real time PCR (PLANT PRINT) in Citrus sp. leaves
Date, reference of the validation report	2020-07-10 - HLB_qPCR_EUPHRESCO-2016-A-232
Link to other validation data	- HLB_qPCR_EUPHRESCO-2016-A-232 Detection and identification of 'Candidatus Liberibacter asiaticus' and 'Candidatus Liberibacter africanus' by Molecular real time PCR (PLANT PRINT) in Citrus sp. leaves
Validation process according to EPPO Standard PM7/98?	yes
Is the lab accredited for this test?	no
Was the validated data generated in the framework of a project?	Euphresco
If yes, please specify	2016-A-232
Description of the test	
Description of the test	
Description of the test Organism(s)	'Candidatus Liberibacter africanus' (LIBEAF) 'Candidatus Liberibacter asiaticus' (LIBEAS)
Description of the test Organism(s) Detection / identification	'Candidatus Liberibacter africanus' (LIBEAF) 'Candidatus Liberibacter asiaticus' (LIBEAS) detection and identification
Description of the test Organism(s) Detection / identification Method(s)	'Candidatus Liberibacter africanus' (LIBEAF) 'Candidatus Liberibacter asiaticus' (LIBEAS) detection and identification Molecular Extraction DNA RNA Molecular real time PCR
Description of the test Organism(s) Detection / identification Method(s) Method: Molecular Extraction DNA RNA	'Candidatus Liberibacter africanus' (LIBEAF) 'Candidatus Liberibacter asiaticus' (LIBEAS) detection and identification Molecular Extraction DNA RNA Molecular real time PCR
Description of the test Organism(s) Detection / identification Method(s) Method: Molecular Extraction DNA RNA Reference of the test description	'Candidatus Liberibacter africanus' (LIBEAF) 'Candidatus Liberibacter asiaticus' (LIBEAS) detection and identification Molecular Extraction DNA RNA Molecular real time PCR
Description of the test Organism(s) Detection / identification Method(s) Method: Molecular Extraction DNA RNA Reference of the test description Kit	'Candidatus Liberibacter africanus' (LIBEAF) 'Candidatus Liberibacter asiaticus' (LIBEAS) detection and identification Molecular Extraction DNA RNA Molecular real time PCR
Description of the test Organism(s) Detection / identification Method(s) Method: Molecular Extraction DNA RNA Reference of the test description Kit Is a kit used	'Candidatus Liberibacter africanus' (LIBEAF) 'Candidatus Liberibacter asiaticus' (LIBEAS) detection and identification Molecular Extraction DNA RNA Molecular real time PCR
Description of the test Organism(s) Detection / identification Method(s) Method: Molecular Extraction DNA RNA Reference of the test description Kit Is a kit used Manufacturer name	'Candidatus Liberibacter africanus' (LIBEAF) 'Candidatus Liberibacter asiaticus' (LIBEAS) detection and identification Molecular Extraction DNA RNA Molecular real time PCR yes QIAGEN
Description of the testOrganism(s)Detection / identificationMethod(s)Method: Molecular Extraction DNA RNAReference of the test descriptionKitIs a kit usedManufacturer nameSpecify the kit used	'Candidatus Liberibacter africanus' (LIBEAF) 'Candidatus Liberibacter asiaticus' (LIBEAS) detection and identification Molecular Extraction DNA RNA Molecular real time PCR yes QIAGEN DNeasy Plant Mini Kit

	manufacturer's recommendations.	
Other information		
Other details on the test	Ground using a HOMEX 6 homogenizer (Bioreba AG, Reinach, Switzerland) with 5 mL of extraction buffer (pH = 8): 50 mM Sigma 7-9® TRIS (Merck KGaA, Darmstadt, Germany); 5 mM EDTA (Merck KGaA); and 1%sodium dodecyl sulfate (Merck KGaA)	
Method: Molecular real time PCR		
Reference of the test description		
As or adapted from an EPPO diagnostic protocol	no	
As or adapted from an IPPC diagnostic protocol	no	
Is the test modified compared to the reference test	no	
Kit		
Is a kit used	yes	
Manufacturer name	PLANT PRINT	
Specify the kit used	Liberibacter' spp. (Huanglongbing-HLB citrus disease). Rapid screening test	
Kit used following the manufacturer's instructions?	yes	
Other information		
Reaction type	Simplex - Probe	
Other details on the test	Real-time PCR targeting 16S rRNA gene (according to Bertolini et al. (2010, 2014))	
Are the performance characteristics included in the EPPO diagnostic protocol?	no	
Performance Criteria :		
Organism 1.:	'Candidatus Liberibacter africanus'(LIBEAF)	
Analytical sensitivity		
What is smallest amount of target that can be detected reliably?		
Diagnostic sensitivity		
Proportion of infected/infested samples tested positive compared to results from the standard test, see appendix 2 of PM 7/98	1 (DSE=PA/N+, Fav. Hypothesis, considering CLas and CLaf samples)	
Diagnostic Specificity		
Proportion of uninfected/uninfested samples (true negatives) testing negative compared to results from a standard test	0.679 (DSP=NA/N-, Fav. Hypothesis, considering CLas and CLaf samples)	
<u>Reproducibility</u>		
Provide the calculated % of agreement for a	CO=0.889 (considering CLas and CLaf samples)	

given level of the pest (see PM 7/98)		
Repeatability		
Provide the calculated % of agreement for a given level of the pest (see PM 7/98)	DA=1 (considering CLas and CLaf samples)	
Organism 2.:	'Candidatus Liberibacter asiaticus'(LIBEAS)	
Analytical sensitivity		
What is smallest amount of target that can be detected reliably?		
Diagnostic sensitivity		
Proportion of infected/infested samples tested positive compared to results from the standard test, see appendix 2 of PM 7/98	1 (DSE=PA/N+, Fav. Hypothesis, considering CLas and CLaf samples)	
Analytical specificity - exclusivity		
Number of non-target organisms tested		
Specificity value		
Diagnostic Specificity		
Proportion of uninfected/uninfested samples (true negatives) testing negative compared to results from a standard test	0.679 (DSP=NA/N-, Fav. Hypothesis, considering CLas and CLaf samples)	
Reproducibility		
Provide the calculated % of agreement for a given level of the pest (see PM 7/98)	CO=0.889 (considering CLas and CLaf samples)	
Repeatability		
Provide the calculated % of agreement for a given level of the pest (see PM 7/98)	DA=1 (considering CLas and CLaf samples)	
Test performance study		
Test performance study?	yes	
Brief details of the test performance study and its output.It available, link to published article/report	Test performance study organized in the framework of a EUPHRESCO project involving 8 international laboratories.
