**Summary sheet of validation data for a diagnostic test**

The EPPO Standard PM 7/98 *Specific requirements for laboratories preparing accreditation for a plant pest diagnostic activity* describes how validation should be conducted. It also includes definitions of performance criteria.

<b>Analytical sensitivity</b>	
<b>What is smallest amount of target that can be detected reliably?</b>	10 <sup>4</sup> -10 <sup>6</sup> CFU/mL plant extract after DNA extraction using RED-extract-N-Amp T kit (in ring test 2010)
<b>Diagnostic sensitivity</b>	
<b>Proportion of infected/infested samples tested positive compared to results from the standard test, see appendix 2 of PM 7/98</b>	Proportion of true positives/total number of samples: 0.48 (in samples from 1 to 10 <sup>6</sup> CFU/mL and healthy samples in ring test 2010).
<b>Analytical specificity - inclusivity</b>	
<b>Number of strains/populations of target organisms tested</b>	Contact authors of Stöger et al (2006) Do not detect E. amylovora strains without pEA29.
<b>Specificity value</b>	
<b>Analytical specificity - exclusivity</b>	
<b>Number of non-target organisms tested</b>	Contact authors of Stöger et al (2006)
<b>Specificity value</b>	
<b>Diagnostic Specificity</b>	
<b>Proportion of uninfected/uninfested samples (true negatives) testing negative compared to results from a standard test</b>	Proportion of true negatives/total number of samples: 0.95 (in samples from 1 to 10 <sup>6</sup> CFU/mL and healthy samples in ring test 2010).
<b>Reproducibility</b>	
<b>Provide the calculated % of agreement for a given level of the pest (see PM 7/98)</b>	80% in IVIA assays when tested with different operators
<b>Repeatability</b>	
<b>Provide the calculated % of agreement for a given level of the pest (see PM 7/98)</b>	92% in IVIA assays
<b>Test performance study</b>	
<b>Test performance study?</b>	yes

<b>Brief details of the test performance study and its output. It available, link to published article/report</b>	Yes (14 laboratories from Europe, Morocco, USA and New Zealand) analysed 10 samples each (from 1 to 10 <sup>6</sup> CFU/mL plant extract and healthy samples). Details about ring test protocol available.
