EUROPEAN AND MEDITERRANEAN PLANT PROTECTION ORGANIZATION ORGANISATION EUROPEENNE ET MEDITERRANEENNE POUR LA PROTECTION DES PLANTES Summary sheet of validation data for a diagnostic test

The EPPO Standard PM 7/98 Specific requirements for laboratories preparing accreditation for a plant pest diagnostic activity describes how validation should be conducted. It also includes definitions of performance criteria.

Laboratory contact details National Institute of Biology, Department of Biotechnology and Systems Biology Vecna pot 121, 1000 Ljubljana, Slovenia Short description of the test Validation report on the testing of Chrysanthemum stem necrosis virus by real-time RT-PCR Date, reference of the validation report Ca24-04-30 - Validation report on the testing of Chrysanthemum stem necrosis virus by real-time RT-PCR Link to other validation data -Validation report on the testing of Chrysanthemum stem necrosis virus and other American clade 1 tospoviruses by RT-PCR. Validation report on the testing of Chrysanthemum stem necrosis virus and other American clade 1 tospoviruses by RT-PCR. Validation process according to EPPO Standard PMT/987 Is the lab accredited for this test? no EURL Was the validated data generated in the framework of a project? If yes, please specify EURL-Virology (European Union Reference Laboratory for pests of plants on viruses, viroids and phytoplasmas) Description of the test Organism(s) Chrysanthemum stem necrosis virus / Orthotospovirus chrysanthinecrocaulis (CSNV00) Detection / Identification Method(s) Molecular Extraction DNA RNA Reference of the test description As or adapted from an EPPO diagnostic protocol PM 7/139 Tospoviruses (genus Orthotospovirus) (version 1) As or adapted from an IPPC diagnostic protocol		
stem necrosis virus by real-time RT-PCR 2024-04-30 - Validation report on the testing of Chrysanthemum stem necrosis virus by real-time RT-PCR Link to other validation data - Validation report on the testing of Chrysanthemum stem necrosis virus and other American clade 1 tospoviruses by RT-PCR. Validation report on the testing of Chrysanthemum stem necrosis virus and other American clade 1 tospoviruses by RT-PCR. Validation report on the testing of Chrysanthemum stem necrosis virus and other American clade 1 tospoviruses by RT-PCR Validation process according to EPPO yes Standard PM7/987 Is the lab accredited for this test? In o Was the validated data generated in the framework of a project? If yes, please specify EURL-Virology (European Union Reference Laboratory for pests of plants on viruses, viroids and phytoplasmas) Description of the test Organism(s) Chrysanthemum stem necrosis virus / Orthotospovirus chrysanthinecrocaulis (CSNV00) Detection / identification Method(s) Molecular Extraction DNA RNA Molecular real time RT PCR Method: Molecular Extraction DNA RNA Reference of the test description As or adapted from an EPPO diagnostic protocol EPPO Diagnostic Protocol name PM 7/139 Tospoviruses (genus Orthotospovirus) (version 1) As or adapted from an IPPC diagnostic	Laboratory contact details	Biotechnology and Systems Biology
Chrysanthemum stem necrosis virus by real-time RT-PCR Link to other validation data - Validation report on the testing of Chrysanthemum stem necrosis virus and other American clade 1 tospoviruses by RT-PCR. Validation report on the testing of Chrysanthemum stem necrosis virus and other American clade 1 tospoviruses by RT-PCR. Validation report on the testing of Chrysanthemum stem necrosis virus and other American clade 1 tospoviruses by RT-PCR. Validation process according to EPPO Standard PM7/98? Laboratory for pests of plants on viruses, viroids and phytoplasmas) Description of the test Chrysanthemum stem necrosis virus / Orthotospovirus chrysanthinecrocaulis (CSNV00) Detection / identification Method(s) Molecular Extraction DNA RNA Molecular real time RT PCR Method: Molecular Extraction DNA RNA Reference of the test description As or adapted from an EPPO diagnostic protocol EPPO Diagnostic Protocol name PM 7/139 Tospoviruses (genus Orthotospovirus) (version 1) As or adapted from an IPPC diagnostic no		EURL
Organism(s) Chrysanthemum stem necrosis virus / Orthotospovirus chrysanthinecrocaulis (CSNV00) Detection / identification Method(s) Molecular Extraction DNA RNA Molecular real time RT PCR Method: Molecular Extraction DNA RNA Reference of the test description As or adapted from an EPPO diagnostic protocol EPPO Diagnostic Protocol name PM 7/139 Tospoviruses (genus Orthotospovirus) (version 1) As or adapted from an IPPC diagnostic	If yes, please specify	Laboratory for pests of plants on viruses, viroids
Organism(s) Chrysanthemum stem necrosis virus / Orthotospovirus chrysanthinecrocaulis (CSNV00) Detection / identification Method(s) Molecular Extraction DNA RNA Molecular real time RT PCR Method: Molecular Extraction DNA RNA Reference of the test description As or adapted from an EPPO diagnostic protocol EPPO Diagnostic Protocol name PM 7/139 Tospoviruses (genus Orthotospovirus) (version 1) As or adapted from an IPPC diagnostic	Description of the test	
Detection / identification detection and identification Method(s) Molecular Extraction DNA RNA Molecular real time RT PCR Method: Molecular Extraction DNA RNA Reference of the test description As or adapted from an EPPO diagnostic protocol EPPO Diagnostic Protocol name PM 7/139 Tospoviruses (genus Orthotospovirus) (version 1) As or adapted from an IPPC diagnostic no		
Method(s) Molecular Extraction DNA RNA Molecular real time RT PCR Method: Molecular Extraction DNA RNA Reference of the test description As or adapted from an EPPO diagnostic protocol EPPO Diagnostic Protocol name PM 7/139 Tospoviruses (genus Orthotospovirus) (version 1) As or adapted from an IPPC diagnostic no	Organism(s)	I
Method: Molecular Extraction DNA RNA Reference of the test description As or adapted from an EPPO diagnostic protocol EPPO Diagnostic Protocol name PM 7/139 Tospoviruses (genus Orthotospovirus) (version 1) As or adapted from an IPPC diagnostic no	Detection / identification	detection and identification
Reference of the test description As or adapted from an EPPO diagnostic protocol EPPO Diagnostic Protocol name PM 7/139 Tospoviruses (genus Orthotospovirus) (version 1) As or adapted from an IPPC diagnostic no	Method(s)	
As or adapted from an EPPO diagnostic protocol EPPO Diagnostic Protocol name PM 7/139 Tospoviruses (genus Orthotospovirus) (version 1) As or adapted from an IPPC diagnostic no	Method: Molecular Extraction DNA RNA	•
protocol PM 7/139 Tospoviruses (genus Orthotospovirus) (version 1) As or adapted from an IPPC diagnostic no	Reference of the test description	
(version 1) As or adapted from an IPPC diagnostic no	l	yes
	EPPO Diagnostic Protocol name	
	_	no

	·	
Is the test modified compared to the reference test	no	
Kit		
Is a kit used	yes	
Manufacturer name	QIAGEN	
Specify the kit used	RNeasy Plant Mini Kit	
Kit used following the manufacturer's instructions?	no Total RNA was eluted twice with 50 μ L (total of 100 μ L) of RNase-free water pre-warmed to 65 °C.	
Other information		
Method: Molecular real time RT PCR		
Reference of the test description		
As or adapted from an EPPO diagnostic protocol	yes	
New test being considered for inclusion in the next version of the EPPO diagnostic protocol?	no	
EPPO Diagnostic Protocol name	PM 7/139 Tospoviruses (genus Orthotospovirus) (version 1)	
Name of the test	Real-time RT-PCR test for CSNV (Boben et al., 2007)	
As or adapted from an IPPC diagnostic protocol	no	
Is the test modified compared to the reference test	no	
Kit		
Is a kit used	yes	
Manufacturer name	ThermoFisher Scientific	
Specify the kit used	AgPath-ID™ One-Step RT-PCR	
Kit used following the manufacturer's instructions?	yes	
Other information		
Reaction type	Simplex	
Performance Criteria :		
Organism 1.:	Orthotospovirus chrysanthinecrocaulis(CSNV00)	
Analytical sensitivity		
What is smallest amount of target that can be detected reliably?	Dilutions of CSNV isolates in water and in RNA of chrysanthemum. LOD 10^-4.	
Analytical specificity - inclusivity		
Number of strains/populations of target organisms tested	No of targets tested: 8 (3 isolates + 5 gBlocks).	
Specificity value	100%	
Analytical specificity - exclusivity		

Number of non-target organisms tested	No of non-targets tested: 30 (29 isolates of other tospoviruses and one CSVd).	
Specificity value	100%	
Reproducibility		
Provide the calculated % of agreement for a given level of the pest (see PM 7/98)	No. of target isolates tested: 2 (for each isolate different dilutions were evaluated) No. of operators: up to 3 No. of real-time PCR instruments: up to 5 No. of different days: up to 13 Percentage of identical results (positive replicates) is 100% No. of target isolates tested: 2 (for each isolate different dilutions were evaluated) No. of operators: up to 3 No. of real-time PCR instruments: up to 5 No. of different days: up to 13 Percentage of identical results (positive replicates) is 100%.	
Repeatability		
Provide the calculated % of agreement for a given level of the pest (see PM 7/98)	No. of samples tested: 3 (high, medium and low target concentration) No. of replicates tested: 5 Percentage of identical results (positive replicates) is 100%.	
Test performance study		
Test performance study?	no	
Other information		
Any other information considered useful	Additionally, Impact of the matrix was evaluated and No effect of the matrix on the test result was detected. Full validation report is available on the EURL webpage: https://eurlplanthealth.nl/files/view/b8e2cedf-f922-495a-82b1-b362aba8a4e6/eurl_virology_csnv_real-time-rt-pcr_validation-report_final.pdf
