## EUROPEAN AND MEDITERRANEAN PLANT PROTECTION ORGANIZATION ORGANISATION EUROPEENNE ET MEDITERRANEENNE POUR LA PROTECTION DES PLANTES Summary sheet of validation data for a diagnostic test

The EPPO Standard PM 7/98 Specific requirements for laboratories preparing accreditation for a plant pest diagnostic activity describes how validation should be conducted. It also includes definitions of performance criteria.

Laboratory contact details	Anses Plant Health Laboratory - Nematology Unit Domaine de la Motte au Viconte BP 35327, 35653 Le Rheu, France	
Short description of the test	Detection of Bursaphelenchus xylophilus using LAMP test Kikuchi et al. 2009	
Date, reference of the validation report	2019-12-10 - Bx1	
Validation process according to EPPO Standard PM7/98?	yes	
Is the lab accredited for this test?	no	
Was the validated data generated in the framework of a project?	Other_project	
If yes, please specify	VALITEST	
Description of the test		
Organism(s)	Bursaphelenchus xylophilus (BURSXY)	
Detection / identification	detection	
Method(s)	Molecular Extraction DNA RNA Molecular LAMP	
Method: Molecular Extraction DNA RNA		
Reference of the test description		
As or adapted from an EPPO diagnostic protocol	yes	
New test being considered for inclusion in the next version of the EPPO diagnostic protocol?	no	
EPPO Diagnostic Protocol name	PM 7/004 Bursaphelenchus xylophilus (version 3)	
As or adapted from an IPPC diagnostic protocol	no	
Is the test modified compared to the reference test	no	
Kit		
Is a kit used	yes	
Manufacturer name	QIAGEN	
Specify the kit used	QIAamp DNA Mini Kit	

Kit used following the manufacturer's instructions?	yes	
Other information		
Method: Molecular LAMP		
Reference of the test description		
As or adapted from an EPPO diagnostic protocol	no	
New test being considered for inclusion in the next version of the EPPO diagnostic protocol?	yes	
As or adapted from an IPPC diagnostic protocol	yes	
IPPC diagnostic Protocol name	ISPM 27 Annex 10 DP 10: Bursaphelenchus xylophilus (version 2016)	
Name of the test	Kikuchi et al. 2009	
Is the test modified compared to the reference test	yes fluorescence used (FAM dye) for the detection of the reaction insted of color changes in the original publication	
Kit		
Is a kit used	no	
Other information		
Other details on the test	LAMP master mix used was from Optigene, reference Isothermal master mix ISO-004	
Performance Criteria :		
Performance Criteria :		
Performance Criteria : Organism 1.:	Bursaphelenchus xylophilus(BURSXY)	
	Bursaphelenchus xylophilus(BURSXY)	
Organism 1.:		
Organism 1.:  Analytical sensitivity  What is smallest amount of target that can be		
Organism 1.:  Analytical sensitivity  What is smallest amount of target that can be detected reliably?		
Organism 1.:  Analytical sensitivity  What is smallest amount of target that can be detected reliably?  Diagnostic sensitivity  Proportion of infected/infested samples tested positive compared to results from the	5 individuals	
Organism 1.:  Analytical sensitivity  What is smallest amount of target that can be detected reliably?  Diagnostic sensitivity  Proportion of infected/infested samples tested positive compared to results from the standard test, see appendix 2 of PM 7/98	5 individuals 100%	
Organism 1.:  Analytical sensitivity  What is smallest amount of target that can be detected reliably?  Diagnostic sensitivity  Proportion of infected/infested samples tested positive compared to results from the standard test, see appendix 2 of PM 7/98  Standard test(s)	5 individuals 100%	
Organism 1.:  Analytical sensitivity  What is smallest amount of target that can be detected reliably?  Diagnostic sensitivity  Proportion of infected/infested samples tested positive compared to results from the standard test, see appendix 2 of PM 7/98  Standard test(s)  Analytical specificity - inclusivity  Number of strains/populations of target	5 individuals  100%  Comparison with samples of known status  2 populations of Bursaphelenchus xylophilus from	
Organism 1.:  Analytical sensitivity  What is smallest amount of target that can be detected reliably?  Diagnostic sensitivity  Proportion of infected/infested samples tested positive compared to results from the standard test, see appendix 2 of PM 7/98  Standard test(s)  Analytical specificity - inclusivity  Number of strains/populations of target organisms tested	5 individuals  100%  Comparison with samples of known status  2 populations of Bursaphelenchus xylophilus from China and Portugal	
Organism 1.:  Analytical sensitivity  What is smallest amount of target that can be detected reliably?  Diagnostic sensitivity  Proportion of infected/infested samples tested positive compared to results from the standard test, see appendix 2 of PM 7/98  Standard test(s)  Analytical specificity - inclusivity  Number of strains/populations of target organisms tested  Specificity value	5 individuals  100%  Comparison with samples of known status  2 populations of Bursaphelenchus xylophilus from China and Portugal	
Organism 1.:  Analytical sensitivity  What is smallest amount of target that can be detected reliably?  Diagnostic sensitivity  Proportion of infected/infested samples tested positive compared to results from the standard test, see appendix 2 of PM 7/98  Standard test(s)  Analytical specificity - inclusivity  Number of strains/populations of target organisms tested  Specificity value  Analytical specificity - exclusivity	5 individuals  100%  Comparison with samples of known status  2 populations of Bursaphelenchus xylophilus from China and Portugal  100%  One population for each of the following species: B. macromucronatus, B. doui, B. hoffmani, B.	

Proportion of uninfected/uninfested samples (true negatives) testing negative compared to results from a standard test	100%	
Specify the test(s)	Comparison with samples of known status	
Test performance study		
Test performance study?	yes	
Brief details of the test performance study and its output.It available, link to published article/report	Test performance study organised in the framework of the VALITEST project in 2019, including 4 participating laboratories from 4 countries. All sets of data were considered for the analysis and calculation of performance criteria.
